Education

Thapar Institute of Engineering & Technology

B.E. in Computer Science & Business Systems — CGPA: 7.82

Expected June 2027

Patiala, Punjab

Experience

Talkeys [↗](#)

Nov 2024 – Jul 2025

Product & Growth Associate

- Directed 4 community events, analyzing participation and engagement data to increase participation by **60%**
- Owned the **product roadmap** and **feature prioritization** for a community-driven event platform, using **user research**, user feedback, and **product analytics** to drive decisions for **8000+** users
- Defined **product strategy** and **go-to-market strategy** as a founding contributor, running **experimentation** across **4+** event formats and acquisition channels

Leadership Roles

Helix (TIET's Technical Fest)

Jan 2026 – Apr 2026

Overall Student Coordinator

- Scaled Helix's inaugural **acquisition funnel** to **12,000+** registrations and **850K+** digital reach, managing **20+** industry partners and a **Rs. 25L+** budget
- Led a **450+** member **cross-functional team** across design, technology, operations, and marketing, driving **stakeholder management** and alignment to deliver **30+** events

Enactus Thapar

Sep 2023 – Jul 2025

Marketing & Sponsorship Lead

- Worked on **Atrangi**, an eco-conscious initiative transforming textile waste into sustainable products, empowering **100+** female laborers through local artisan engagement and community-driven sales
- Spearheaded a **360° launch strategy** for flagship event **Aarambh**, boosting reach by **3x** and securing sponsorships

Technical Skills

Languages & Concepts: Python, SQL, C, C++

Developer Tools: Git, GitHub, Figma, N8N, Vercel, Kiro, VS Code, Notion, MATLAB, OpenProj

Relevant Coursework: OOPS, DSA, Software Design, DBMS, Statistical Methods

Product: Roadmapping, Prioritization, Stakeholder Management, User Research, Go-to-Market Strategy

Soft Skills: Leadership, Event Management, Result-Driven, Collaborative, Innovative, Strong Communication

Projects

DataPulse – SQL Visual Query Execution Lab [↗](#) [🔗](#)

Jul 2026

SQL — Query Execution — Product Design

- Engineered a non-simulated **SQL execution lab** on a live **SQLite** engine across **3 relational tables**
- Designed a rowid-diffed query builder supporting **20+ SQL query patterns**, translating raw execution into visual, learner-facing feedback

SafeSpace – Real-Time Multimodal Stress Detection System [↗](#) [🔗](#)

Sep 2025

Machine Learning — Signal Processing — Explainable AI

- Built multimodal stress detection system using **late fusion**; achieved **73% accuracy** on **500+** samples
- Engineered scalable feature pipelines for **8 physiological signals**; trained ML models using **5-fold cross-validation**
- Secured **3rd place** at **Indian-Israeli Hackathon** for making real-world impact

Certifications and Achievements

- Top 3 on campus, Top 15 nationally** in **AMEX Campus Product Challenge** among 2,200+ participants
- Generated **Rs. 8.5L+** in revenue as **Campus Partner** for **Perplexity AI**, ranking among the **top 15 nationally**
- 1st place** among 250+ teams in **InnoQuest** national case study competition at **IIT Roorkee's** Techfest, 2025
- Selected for Amazon ML School'25**, among the **top 1% applicants** nationwide from 300,000+ applications
